**D.I.Y. Installation Steps**

1. Wash surface of balcony or patio.
2. Place containers and fill with Fafard® Urban Garden Container Mix and Fafard® Sea Compost.
3. Place plants as per plan. Mark each location.
4. If the roots are pot bound, gently loosen bottom and sides with your fingers.
5. Fill around each plant with Fafard® Urban Garden Container Mix, pressing firmly to secure in place. Leave a 3” distance from pot top to allow for proper watering.
7. Keep soil moist and harvest your crops when ripe!

*Growing your own vegetables affords you the luxury of eating food at its optimal ripeness and maximum nutritional value, grown right outside your door. A sunny balcony garden can yield a huge crop and is quite simple to maintain. Just remember to keep it watered and eat your bounty before it spoils.*
